BINDING INSTALLATION

COMPONENT ALPINE BINDING INSTALLATION

Service includes binding installation, release setting calculation and implementation, and release/retention testing to manufacturer specifications.

(Requires drilling.)

SKU 042168	\$30
Equipment purchased elsewhere (SKU 1876131)	\$50

SYSTEM ALPINE BINDING INSTALLATION/ADJUSTMENT

Service includes binding installation, release setting calculation and implementation, and release/retention testing to manufacturer specifications.

(Requires no drilling.)

SKU 1612317	\$20
Equipment purchased elsewhere (SKU 1876132)	\$35

TUNING

STONEGRIND PREMIUM BASE CONDITION

Service includes base flattening and structure, edge beveling, and wax application. Custom bevel options may be available - consult your sales associate. Stonegrind Premium Base Conditioning improves glide and turning properties by ensuring proper edge and base contact with snow surface. The Shop recommends conditioning every 7 to 10 days on snow.

SKU 042309	\$35
------------------	------

NEW SKI OR SNOWBOARD PREP SERVICE

Includes base flattening, structuring, top sheet cleaning, and hot wax. **Available only with the purchase of a new pair of skis or a snowboard from The Shop.** The manufacturing and transportation process for skis and snowboards often causes concave or convex base properties in new equipment. A new prep service improves the initial performance of your equipment by eliminating those base inconsistencies and ensuring proper contact with snow surfaces.

SKU 660142	\$12
------------------	------

HAND WAX & FINISH

Hand wax application ensures maximum wax absorption and optimal glide properties. Ask your sales associate about special wax instructions including the application of specific wax temperature ranges.

SKU 1795858	\$15
-------------------	------

HOT WAX

Machine wax application of all temperature glide wax. Skis or snowboards with rusted edges require base conditioning (Tune-Up or Stonegrind) prior to wax application. The Shop recommends waxing your skis or snowboard prior to each use for optimum performance.

SKU 042242	\$10
------------------	------

BASE REPAIR

Repair to minor scrapes and gouges that exceed 2mm in depth and/or 8 inches in total length. Includes Stonegrind Premium Base Conditioning.

Note: Some damage may not be repairable.

SKU 659508	\$60
------------------	------

RACE SERVICES

SATISFACTION GUARANTEED

The Shop ski and snowboard tuning services are performed by industry trained and certified technicians using the latest technology and the most exacting standards to ensure that the performance of your equipment meets your expectations! If the tuning services performed do not meet your expectations, return the equipment to The Shop and the service will be performed again at no cost to you.

Thank you for choosing The Shop at Cannonsburg by MC Sports...we appreciate the opportunity to accommodate all of your ski and snowboard service needs.

Tuning services guarantee expires 10 days after service date. Original service receipt required for all guarantee services. Guarantee applies only to tuning and waxing services. Waxes applied by The Shop are universal temperature waxes and, by nature, are not guaranteed to perform exceptionally in all snow conditions. Guarantee applies only to edge bevel services performed to standard manufacturer recommendations. Custom edge bevels cannot be guaranteed. Guarantee applies only to satisfaction within the capabilities of each service (i.e. services can not be guaranteed to fix damages or enhance performances they do not normally fix or enhance).
